QUICK START GUIDE

THIS GUIDE RELATES TO THE FOLLOWING STYLESHEETS:

PRODUCT: STRATEGI®

DATA FORMAT: ESRI SHAPEFILE (SHP)

STYLESHEET FORMAT: STYLED LAYER DESCRIPTORS (SLD)

The stylesheets have been designed to work with the data as it is supplied

1   Either fork the stylesheets on GitHub or download them and navigate to the directory that matches your data format, stylesheet format and style preference.

2   Copy the font 'Strategi_Symbols.ttf' into your systems font directory (on Windows machines this is C:\Windows\Fonts). Replace any previous version. Your machine may require a restart.

3   Load your Strategi data into GeoServer.

4   **Add the styles.** If using the GUI then navigate to Styles > Add a new style > Browse and select to add each file in turn.

5   **Publish these styles with the data.** If using the GUI then navigate to Layers > Add a new resource and choose them from the relevant database to add each file in turn, click on publish, configure settings and then choose the matching style before saving.

6   **To create Strategi in GeoServer you will need to create a Layer Group.** If using the GUI then navigate to Layer Groups > Add new layer group > Add Layer and choose each layer in turn to create the following layer order:

Layers

⊕ Add Layer...
⊕ Add Layer Group...

	Drawing order	Layer	Default Style	Style	Remove
1	⬇	osgb:woodland_region	☐	Strategi-full-colour-woodland_region	⊖
2	⬆ ⬇	osgb:urban_region	☐	Strategi-full-colour-urban_region	⊖
3	⬆ ⬇	osgb:lakes_region	☐	Strategi-full-colour-lakes_region	⊖
4	⬆ ⬇	osgb:foreshor_region	☐	Strategi-full-colour-foreshor_region	⊖
5	⬆ ⬇	osgb:national_park	☐	Strategi-full-colour-national_park	⊖
6	⬆ ⬇	osgb:rivers_line	☐	Strategi-full-colour-rivers_line	⊖
7	⬆ ⬇	osgb:ferry_line	☐	Strategi-full-colour-ferry_line	⊖
8	⬆ ⬇	osgb:railway_line	☐	Strategi-full-colour-railway_line	⊖
9	⬆ ⬇	osgb:admin_line	☐	Strategi-full-colour-admin_line	⊖
10	⬆ ⬇	osgb:coastline	☐	Strategi-full-colour-coastline	⊖
11	⬆ ⬇	osgb:minor_road	☐	Strategi-full-colour-minor_road	⊖
12	⬆ ⬇	osgb:b_road	☐	Strategi-full-colour-b_road	⊖
13	⬆ ⬇	osgb:a_road	☐	Strategi-full-colour-a_road	⊖
14	⬆ ⬇	osgb:primary_road	☐	Strategi-full-colour-primary_road	⊖
15	⬆ ⬇	osgb:motorway	☐	Strategi-full-colour-motorway	⊖
16	⬆ ⬇	osgb:transport_symbol	☐	Strategi-full-colour-transport_symbol	⊖
17	⬆ ⬇	osgb:land_use_symbol	☐	Strategi-full-colour-land_use_symbol	⊖
18	⬆ ⬇	osgb:tourist_symbol	☐	Strategi-full-colour-tourist_symbol	⊖
19	⬆ ⬇	osgb:spot_height	☐	Strategi-full-colour-spot_height	⊖
20	⬆ ⬇	osgb:railway_point	☐	Strategi-full-colour-railway_point	⊖
21	⬆ ⬇	osgb:transport_text	☐	Strategi-full-colour-transport_text	⊖
22	⬆ ⬇	osgb:settlement_seed	☐	Strategi-full-colour-settlement_seed	⊖
23	⬆ ⬇	osgb:general_text	☐	Strategi-full-colour-general_text	⊖
24	⬆	osgb:land_use_seed	☐	Strategi-full-colour-land_use_seed	⊖

The name of this Layer Group is the 'layer' your web map service (WMS) will need to call.
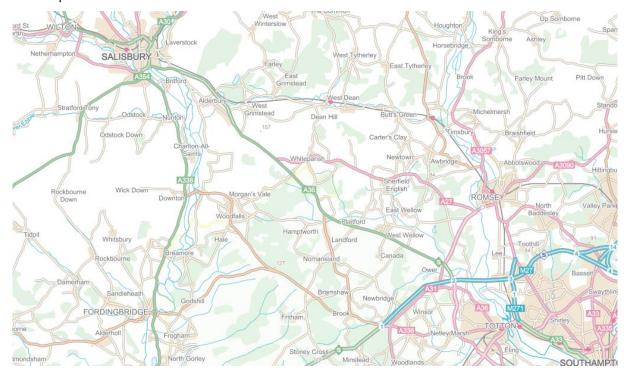

Although every feature is styled, for use as a general contextual map we have commented some of them out by default. Remove the associated <!-- and --> tags to turn these sections on.
We haven't included *admin_seed*, *antiquity_line*, *ferry_box* and *road_point* in the group but SLDs exist for your convenience, again remove the comment out notation.

The scale denominators have been set to allow viewing between 1:70 000 and 1:250 000, although this will vary slightly by resolution.

Ordnance Survey

Your map should now look similar to this:

Compatibility notes

Although SLD is an open OGC standard, these SLDs do contain some extended code used by GeoServer, namely the 'vendor option' tags.
